It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Established, by R. GREAVES, Esq. as his Works, near the River Avon, and sent to all parts of the Kingdom per boat or rail, at a reduced price to the trade.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvement in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing advantages over the composition lime wash or Keene's Cement for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and, being a non-conductor, is admirably adapted for Railway Stations, Public Warehouses, Dairies, Schools, &c. One coat will cover 100 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external use, stands in a position at present unrivalled for its kind; it has no cementic qualities; may be painted or papered in a few days; never blisters, cracks, or repotates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, price lists, and every information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, 33, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

Lucht and Dark equal to any made.

Also, Manufacturers of PLASTER MASTIC, &c. Importers of MARBLE and PUZZOLANA. Dealers in Stone, Slabs, Hair, Whiting, &c.

MEDINA (ROMAN) CEMENT.—The Lime of which this cement is made is obtained in the Isle of Wight. It was for the properties of the Sheppy Stone but is in each better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Plymouth, in a similar work at Aldernay; and at Dover new pier, to unite the masonry. The foundations of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new quarry of Sandown Bay, Isle of Wight, has been commenced of the other materials, and the cement and are shipped. The work extends 200 feet into the sea, and is exposed at the most violent gales of the Channel, in a position where every former construction had been repeatedly washed away. The inconvenience of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.
